Benefits of 700d DECT Series Handsets

Antimicrobial-Treated Plastics

Mitel's 712dt and 722dt DECT handsets are built using plastics treated with an antimicrobial compound from BioCote* that is shown to inhibit the growth of certain bacteria on the phone's plastic surfaces. The handset's design also minimizes crevices and holes that might collect germs, dirt, and grime.

Reliable Connections and Superior Audio

Mitel's 700d DECT Series handsets are built to the highest security standards — secure signaling, voice encryption, user authentication, and more — to safeguard your secrets and ensure confidential communications. The excellent HD sound quality featuring an ambient noise filter for loud environments makes it possible to work stress free and relaxed, especially in hands-free mode.

Adjustable Display and Intuitive Use

The 700d DECT Series' 2.4 inch color scratch-resistant IPS display that leverage liquid crystals aligned in parallel to produce rich colors. The large display size provides the perfect conditions for intuitive menu guidance and ergonomic operation. The handset has a color-coded display to show priority, and programmable answer buttons in the message for faster response handling.

Latest IP and DECT Security

The Mitel 700d DECT Series supports the Generic Access Profile (GAP) standard, DSAA authentication between base and handset, DECT encryption, enhanced DECT security, and DECT XQ technology to minimize interference in reflecting environments.

Unprecedented Flexibility

Tailor your handset the way you want for the way you work using a broad array of add-on accessories, including certified headsets, carrying/ belt clip, desktop/handset/battery rack charger and other options.

Put your workers safety first

Protect lone workers or colleagues when getting into a dangerous situation regardless of its environment. The 700d DECT Series provides support man-down, no-movement, multi-function alarm button, APEX/EX support. The location application lets you spot the area where the incident/alarm occurred.

Mitel 732d DECT Handset

The Mitel 732d DECT Handset is a robust and ergonomic handset that meets the demand for industrial businesses and is designed for use in tough working environments and is an ideal fit for a wide range of business verticals. With its emergency alarm key and integrated "man-down" sensor alarm, the phone is designed to protect vulnerable workers. The device satisfies industrial standard IP 65, and with its high level of dust tight protection and light jet-water resistance, it can be used anywhere outdoors or in production areas. Mitel 732d is capable of withstanding fall heights of up to 2m onto concrete.

Mitel 742d DECT Handset

The 742d DECT handset is a naturally safe handset for use in potentially perilous situations and backings coordinated personal alerts and man-down/no-development cautions. The handset has the same capabilities as the 732d, but the 742d is also certified for usage within hazardous areas and fulfils the ATEX/UKCA guidelines for Class I Zone 1 and Class I Zone 21. Hazardous areas are typically found in the petrochemical, pharmaceutical and food processing industries, but also in aerospace, fuel handling and many other sectors.

Maximum Freedom of Movement

The 722dt/732d/742d DECT handsets now support Bluetooth® 5.0. The support for cordless BT headsets or earbuds provides maximum freedom of movement, while freeing your hands when it is inconvenient to hold the handset in the retail shop, industry floor or hospital environment. Mitel provides several certified BT headsets to simplify deployments for our partners and customers. The certified BT headset also includes headsets from our partner Jabra as well as others like Peltor from 3M that is designed for industrial usage.
